NIRMAL RANPARIYA

REACT NATIVE DEVELOPER

Surat, Gujarat, India | +91 96646 48614 | nirmaltech.dev@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

React Native Developer with 2.5 years of experience, serving as sole React Native developer on three client applications, including a live social-trading platform and a nationwide all-digital telecom app for Telkomsel. Proficient in TypeScript, Redux Saga, Firebase (Auth, Firestore, FCM), and REST API integration, with hands-on experience across the full app lifecycle — native module integration, OTA releases via CodePush, and Play Store / App Store deployment. Comfortable working directly in native Android/iOS code to close gaps that pure React Native can't cover.

TECHNICAL SKILLS

Mobile: React Native, Expo, React Navigation, Android, iOS
Languages: JavaScript (ES6+), TypeScript, Java (Android), Swift (basic iOS)
State & Data: Redux, Redux Saga, Zustand, React Query
Backend & APIs: REST API integration, Node.js, Express.js
Cloud & Services: Firebase (Authentication, Firestore, FCM)
Mobile Capabilities: Push Notifications, Deep Linking, OTA Updates (CodePush/Expo), Native Modules
Databases: MongoDB, PostgreSQL, MySQL, Firestore
Tools: Git, GitHub, Android Studio, Xcode

PROFESSIONAL EXPERIENCE

React Native Developer — Ofniinfo Software Solutions Pvt. Ltd. *Surat, India | June 2024 – Present*

- Developed and shipped production React Native features across Android and iOS for multipleclient products, using TypeScript, Redux Saga, and React Navigation.
- Integrated REST APIs and Firebase services (Authentication, Firestore, FCM) to power core app functionality, real-time notifications, and user data sync.
- Implemented native modules and platform-specific code (Java/Swift) to bridge device features — camera, permissions, push notifications — where React Native's built-in APIs fell short.
- Shipped feature updates via OTA releases (CodePush / Expo), reducing dependence on app-store review cycles for non-native changes.
- Collaborated directly with UI/UX designers and backend teams to translate designs into responsive, production-ready interfaces.

OPIGO — Social Trading Platform (Mumbai) *— Sole React Native Developer | Play Store & App Store*

- Built and enhanced core React Native features for a social trading app supporting opinion sharing, polling, and market discussion.
- Developed the “Decks” subscription system, giving users access to curated investment strategies and SEBI-registered expert recommendations.
- Integrated real-time notification delivery across in-app and WhatsApp channels; rolled out features via CodePush OTA updates.

by.U — Telkomsel's All-Digital Telecom App (Indonesia) *— Sole React Native Developer | Web, Play Store & App Store*

- Developed user-facing React Native features for by.U, Indonesia's first fully app-based telecom service, operated by Telkomsel.
- Built customizable plan flows letting users combine base data with add-ons (“toppings”) for apps like YouTube and Spotify.
- Implemented end-to-end onboarding, SIM ordering, number selection, and in-app plan management.
- Integrated real-time data-usage tracking, recharge flows, and push notifications.

SELA — Classified Marketplace App *— Sole React Native Developer | Developed, not yet published*

- Built core marketplace features in React Native, including listing creation with image upload, pricing, and category management.
- Implemented real-time in-app chat between buyers and sellers, and GPS-based discovery of nearby listings.
- Optimized performance using lazy loading, image caching, and efficient data querying.

EDUCATION

BSc IT (Computer Science) — Saurashtra University, Rajkot
2022 – 2025

Languages: Hindi (Fluent) | Gujarati (Fluent) | English (Intermediate)
